Nefertiti

This table lamp was designed after experiencing the power of the Nefertiti as on show in the Neues Museum in Berlin. Some say that the original is not old at all but a reproduction from the beginning the 19th century.

Its presence however is so strong that it keeps this presence, even as a table lamp.

The proportions are an exact representation of the original in Berlin.

The base is made of solid American walnut and the lampshade is made of pure silk. The cord comes in a cotton woven jacket.
